

The Alcuf Double Post System

The Alcuf Double Post System

Aluminum Adjustable Renovate Lifetime warranty against rot or rust.
Completely adjustable for any height or elevation.
Without a post, there's no fence. The most critical part of the fence structure is the post. Fences can last for years with the Alcuf Double Post System. Older fences can also be renovated.

Easy to Install No need to worry about post spacing. Rails pass through the post. Anyone that can install a wood post can install an Alcuf Double Post. In fact, it is easier since there is no nailing, and no fixed spacing required.

Unlimited Styles Alcuf Double Posts let you build wood fences the way you are used to building them. It is just an upgraded post that makes the entire investment last! You can build ANY type of traditional wood fence.
Using your imagination, and Alcuf Double Posts, you can be very creative. You can even fence in a circle or curve by laminating the horizontal rails.

Add to Existing Add to your old fence as required. Alcuf Double Posts look the same, so they'll match. Then, replace existing posts as required.

Recyclable Alcuf Double Posts are made of tough, resilient aluminum. Aluminum is 100% recyclable and environmentally friendly. Do your part in preserving our forests by making sure your fence is not going to have to be replaced in just a few years.
